

**Catalina-Rincon FireScape Steering Group Agenda**  
**October 7, 2009**  
**1 p.m. at The Nature Conservancy (1510 E. Fort Lowell)**

**Contract/budget status:** Update (Don/Brooke/Randall).

**Outreach/web update:** Website progress and review comments. Report on meetings with Pima County, SAF, Catalina State Park and follow up needed. Outreach calendar and other engagement business. (Steve)

**Science update:** Results of working group session and other news (Don).

**Mapping our way towards a proposed action:** Report on continuation of the mapping of “manageable block” treatment areas by Josh et al (Josh et al). Clarification of UA and CNF GIS roles (Don).

**Ecological unit descriptions for proposed action:** Progress with unit descriptions (Brooke/Jim).

**The NEPA process and proposed action package to hand off to TEAMS:** At our September 2 meeting we agreed that an EA was our likely choice but that we would make sure we followed HFRA steps such that we had that option as long as possible. We know we want to give TEAMS ecological unit descriptions and “manageable block map,” but what else? How are we doing with the scale/site-specificity issue? (Jennifer/Brooke)

**Planning for Chris French Oct 21-22 visit:** On the agenda are  
--a show and tell from science for Chris, agency staff, and others Wednesday afternoon  
--time for science folks to pick Chris's brain about getting TEAMS help Thursday morning  
--a discussion about NEPA and other compliance + handing off proposed action Thursday afternoon  
Locations, invitations, content, roles (Brooke/Don/Jennifer).

**Preparation for FLT presentation November 17 or 18:** What kind of presentation do we want to make (Stan/Randall)?

**Anything else?**
