

**Catalina-Rincon FireScape Steering Group Agenda
November 4, 2009**

1:30 p.m. (NEW TIME) at The Nature Conservancy (1510 E. Fort Lowell)

Vision Team and flow chart: How are we managing all the FireScape projects? Look at Jennifer's diagram. Discuss an "assessment" that lays out the landscape-scale vision before we launch compliance efforts. Yearly implementation plan.

Where do we stand with TEAMS and the NEPA process for Catalina-Rincon?
(Jennifer/Brooke/Randall/Stan)

Science update: Budget. Schedule for fuel model assignment work, proposed interaction with TEAMS, December 3 meeting with TEAMS. (Brooke/Tom S).

Preparation for FLT presentation November 17: What kind of presentation do we want to make and who will make it (Stan/Randall)? Time/location?

Outreach/web update: (Steve off hunting so Brooke will attempt to lead) Please look at the latest contact list (LTRR site: <https://www.ltrr.arizona.edu/~lmwilson/project/> collaborator = user / serotinous = pword). We need to have one of us assigned as key contact for Congressional Delegation, County Supervisors, County Administrators, Fire District Chiefs, etc. Anyone we should add to the list?

Look at outreach schedule and who should be invited to various events. Thoughts on Forest Health Council presentation Jan 14?

Web site: See the attached schedule. Time frames are tight but if we are going to "go public" with meetings the start of 2010 we need to have a usable website up and running.
